

MI'KMAQ FAMILY HEALTH SERVICES

M.A.T. PROGRAM

Medication for Opioid Use Disorder (MOUD) is an evidence-based approach that uses Buprenorphine (Suboxone) to treat individuals with opioid use disorder. This service is also known as M.A.T. (Medication Assisted Treatment), and is offered as a collaboration between medical and counseling services here at MFHS.

For anyone interested in learning more about opioid use disorder treatment, please contact either medical or behavioral health services. Clinic 764-1792. Behavioral Health 764-4756.

Harm reduction resources are available such as Naloxone (Narcan) for free and by prescription
